USING THE AMA FORMAT

The AMA format is widely used for citing sources in medical research. This information, created by the American Medical Association, is taken from *AMA Manual of Style: A Guide for Authors and Editors* (10th Edition). For additional guidelines, please consult the manual at the Client Services Desk of the Medical Sciences Library.

CITATIONS IN THE BODY OF THE PAPER
Cite each source in numerical order using superscript Arabic numerals (1, 2, 3...). Put these numerals outside commas and periods, and inside semicolons and colons (see examples below). Put a comma (no space in front) between the numbers for multiple citations (see Example 2). Join a closed series with a hyphen (see Example 3).

*Example 1:* A review of regulations has been complete by the WHO. 15
*Example 2:* The data were as follows 3,4:
*Example 3:* As previously reported, 11-14,25

CITATIONS IN THE REFERENCE LIST
At the end of the document, list references numerically in the order by which they were cited in the text. Single-space within citations and double-spaces between citations. (Cite references parenthetically in the text if a work is not yet accepted for publication or is a personal communication. See *AMA Manual of Style*, 10th Edition, for more specifics.)
