

How to Embed Online Library Resources

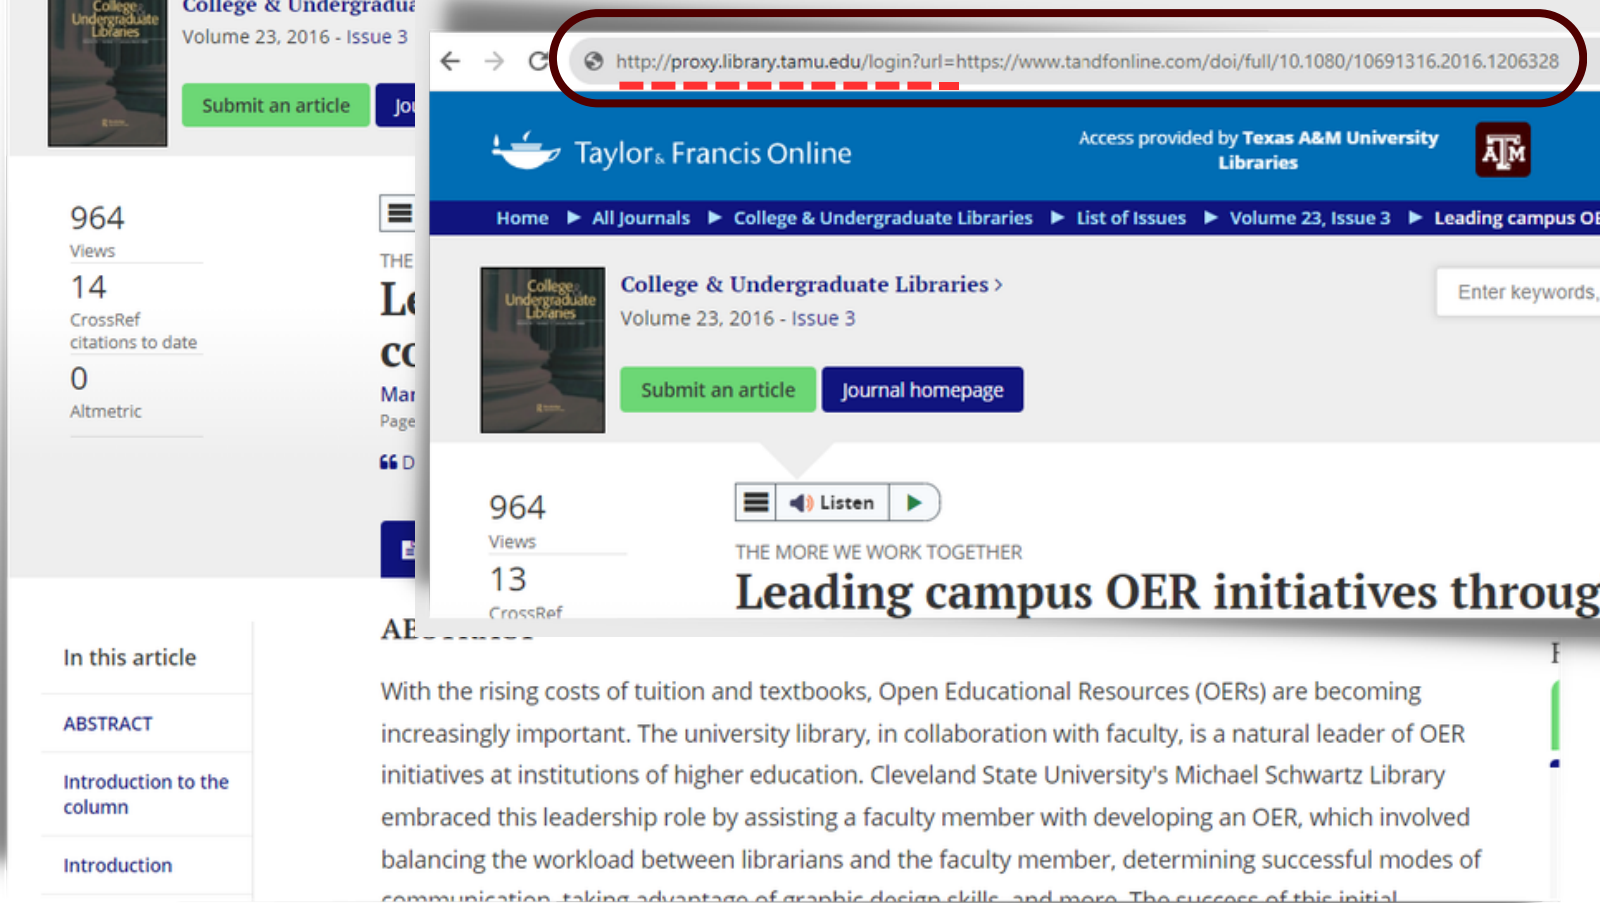

There are 2 ways to ensure students can access online library resource links that you include in your course.

- 1 If you already have a link to a resource from the libraries databases, simply add the library proxy to the front of the URL. **<http://proxy.library.tamu.edu/login?url=>**

Original article URL:

With proxy added:

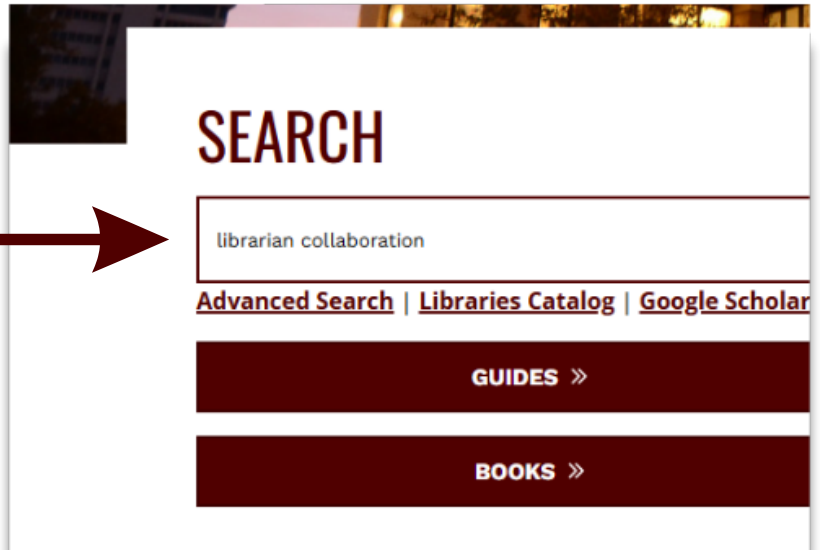

How to Embed Online Library Resources

2

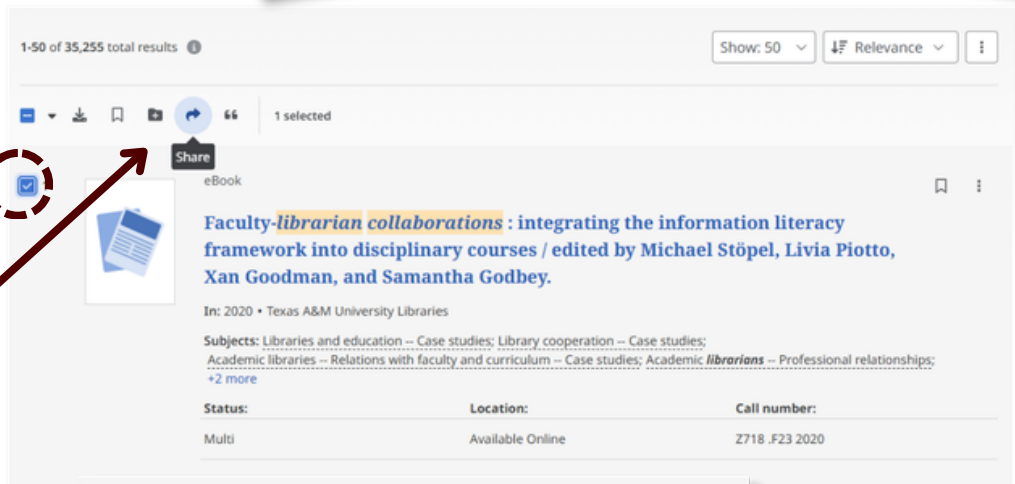

You can generate a persistent/permanent link from the library's Quick Search function on the homepage.

Conduct your search using this search bar.

On the results page, select the check mark for the article you want to share.

Then click the "arrow" to open the share options.

Choose "create link" to receive the persistent link to the article.
