

How to Request Librarian Instruction

Invite a librarian to work with your students. Librarians will customize a session to meet your students' needs, from library orientations to advanced research concepts.

Where to request:

Go to the Libraries website and navigate to the form:

library.tamu.edu

>services

>instructional services

>schedule a library class

What to share with us:

In addition to basic information like your preferred date and class size, the form will also ask the following information so we can plan a successful lesson for your students:

1. A description of your course
2. Your learning outcomes for the session
3. A copy of your assignment
